English ███████

PROFILE

At the moment I work as a quality control engineer in a gambling product company. In addition to testing, my responsibilities include mentoring and a test review for less experienced colleagues.
I am also interested in automated testing, and I would like to develop in this area in the future. In my free time, I try to use various frameworks for automated testing.

WORK EXPERIENCE

QA ENGINEER

SOFTCORP   2022- now

- Manual testing of web sites (front/back)
